## MSC SUSTAINABLE FISHING CERTIFICATE

### ARGENTINE RED SHRIMP (*Pleoticus muelleri*) OFFSHORE BOTTOM TRAWL FISHERY IN FEDERAL WATERS

CERTIFICATE REGISTRATION CODE:

MSC-F-31675

#### UNIT OF CERTIFICATION

|                                                        |                                                                                                                                                                                                                                                                                                                  |
|--------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Target stock:                                          | Argentine red shrimp ( <i>Pleoticus muelleri</i> )                                                                                                                                                                                                                                                               |
| Geographical area:                                     | FAO Major Fishing Area 41, Southern (Subarea 41.3), Northern Patagonian (Division 41.3.1). Argentine Sea. Mainly in the location of the closure area for the protection of Argentine hake (AVPJM), between 42° and 48° S, from the provincial jurisdiction line (set up at 12 nm from the coast) to 60° W.       |
| Fishing gear type(s) and, if relevant, vessel type(s): | Bottom trawl carried out by chilling and freezing vessels, exclusively dedicated to catch Argentine red shrimp, known as outriggers trawlers or shrimpers, linked with the client group. The vessel list is provided in the Annex.<br><b>Note: Vessels that are not listed in the Annex, are out of the UoC.</b> |
| Client group:                                          | See CERTIFICATE SCHEDULE                                                                                                                                                                                                                                                                                         |

OIA confirms that the stated Units of Assessment operate in conformance to the MSC Fisheries Standard and the fishery is well managed and sustainable.

The scope of this certification ends at the reception of fresh/frozen shrimp to the client group's facilities, which the CoC certification is needed to reduce any risk of traceability, mix and substitution. It is considered that traceability management systems operated by vessels, the enforcement bodies and the client group are sufficiently robust to meet the MSC fisheries' traceability requirements up to the first point of reception of fresh/frozen shrimp. Therefore, at that point is where the Chain of Custody assessment and certification will begin.

OIA informs that the certified fishery has the right to claim the fishery is a "well managed and sustainable fishery", in accordance with the MSC Fisheries Standard. Further claims made about the fishery shall be in accordance with rules established by MSC.

Date of Certificate is issued: February 11<sup>th</sup>, 2026

Date of Certification is granted: February 11<sup>th</sup>, 2026

Date of Expiry: February 10<sup>th</sup>, 2031
